About the company

Founded in 1957, Multiroir has established itself over the past 60 years as a leading specialist in professional storage and organizational solutions. We manufacture, curate, and distribute high-quality products to prestigious companies across a wide range of industries, including: optics, dental care, laboratories, jewelry, electronics, agriculture, and the food processing sector.

Our ability to build and maintain long-term trust with our clients stems from our core values: uncompromising product quality and strategic consulting expertise. These pillars allow us to introduce an extensive new collection this year, offering high-performance solutions with an excellent quality-to-price ratio.

An environmentally conscious company

Multiroir has been awarded the «EnVol» label (Voluntary Environmental Commitment for Enterprises). This certification serves as formal recognition and validation of our ongoing commitment to environmental sustainability.

The assessment was conducted by AFNOR Certification, an independent certification body that is a market leader in France and one of the most prominent worldwide. Our dedication remains steadfast, as environmental stewardship is a daily challenge. The principles of environmental standards and performance have been fully integrated into our operations through the collective efforts of our teams.

We are proud to see our commitment rewarded and are honored to share this achievement with you.

A dedicated team of experts at your service

Whether you have a specific inquiry or a requirement for equipment, our team of specialists is available via telephone, email, or fax to address all your questions regarding our product range and applications. We provide expert guidance to ensure our solutions are perfectly tailored to your operational needs.

Our team is committed to providing a detailed and personalized quote within 24 hours for all inquiries.

OUR ECO-RESPONSIBLE COMMITMENTS

OFFICIAL CERTIFICATIONS & STANDARDS

ENVOL Certification

Our company is proud to hold the ENVOL certification, a recognition of our commitment to eco-responsibility.

This validates our ongoing efforts to minimize our environmental impact while maintaining the highest standards of product and service quality.

PEFC Certification

Multiroir is committed to producing its catalog exclusively through professionals affiliated with PEFC France.

This ensures that our documentation is sourced responsibly, reflecting our commitment to forest conservation in France and worldwide.

OUR SUSTAINABLE INITIATIVES

Sustainable materials

We take great care in selecting materials from renewable and recycled resources.

This approach goes beyond simply reducing our ecological footprint; it demonstrates our constant search for innovative, eco-friendly solutions without compromising product durability or performance.

Responsible packaging

We are committed to using environmentally friendly packaging, prioritizing recyclability and biodegradability.

By minimizing unnecessary materials, we ensure that every shipment represents a tangible contribution to protecting the planet.

Recyclable products

Every product we design or select is carefully engineered to integrate into the circular economy at the end of its lifecycle.

Our focus on recyclability embodies our firm vision to actively contribute to global waste reduction.

BECOME A PARTNER

Tailored solutions for your business

Expand your product range

- A comprehensive catalog to meet every professional need.
- Strategic rates designed to help you provide superior service to your clients.
- New product launches every year to keep you ahead of market trends.
- Expert assistance available for all your bespoke and specialized requirements.

Logistics & delivery

- Products are stocked in France to ensure maximum responsiveness and short lead times.
- Complimentary delivery on orders over €500 (excl. VAT).
- No minimum order quantity required.

STREAMLINED DISTRIBUTION

NOS MARQUES

Lobrot.com

Multiroir provides professionals with an extensive range of storage, handling, and packaging solutions, including plastic boxes, drawers, bins, and carrying cases.

Mdose.fr

The group's medical division, Mdose, addresses the specialized logistics needs of healthcare facilities, including hospitals, clinics, pharmacies, and nursing homes.

Eclatdefrance.com

Éclat de France specializes in the manufacturing of high-performance glassware and cutlery polishing machines for the hospitality industry. Our solutions enhance hygiene standards while significantly optimizing operational efficiency for Horeca (CHR) professionals.

Marketing support & dedicated sales tools

We provide comprehensive informational materials highlighting the specific benefits of our products within your industry's unique work environments. These tools are designed to help you effectively demonstrate value to your clients.

Dedicated after-sales service

We offer rapid and efficient technical support and after-sales assistance to guarantee end-user satisfaction. This is a critical asset in sectors where equipment is subject to intensive, heavy-duty use.

CONTACT US

As your business evolves, you may be looking to optimize costs or enhance the services you offer.

We provide you with a dedicated account manager who will deliver the most effective solutions tailored to your specific requirements and challenges.

Business hours

Monday to Thursday: 8:30 AM – 12:15 PM / 1:30 PM – 5:30 PM

Friday: 8:30 AM – 12:15 PM / 1:45 PM – 4:00 PM

SEAMLESS ACCESSIBILITY

Access our entire product range in real-time with just one click

multiroir.com

Quickly browse our full catalog and view up-to-date pricing using our intuitive search engine. Make informed decisions with confidence, supported by the detailed technical specifications available for every product on our website.

Immediate call-back service

Request a call-back simply by leaving your phone number. This service eliminates wait times and allows you to stay focused on your business while our team prepares to assist you.

Live chat support

Engage in real-time dialogue with our expert advisors via our website's Live Chat. Get instant advice and immediate answers to your technical or commercial questions.

Customer portal

Manage your personal information and preferences in just a few clicks. Gain quick access to your order history, quotes, and return status.

Streamlined ordering process

Our checkout and quoting process is designed for speed and efficiency. We only request the essential information required to ensure accurate tracking and timely delivery of your order.

Secure payment options

A variety of fully secured payment methods are available, giving you the flexibility to choose the option that best suits your company's procurement policies.

EFFORTLESS ORDERING

A dedicated team to guide you every step of the way

Eco-conscious logistics

Delivering your orders on time is our priority, as is reducing our carbon footprint.

The opening of our new distribution center near Dijon allows us to significantly reduce shipping distances to Central and Southern France.

Shipping & delivery

Free Shipping: On all orders over €500 (excl. VAT).

Flat Rate: A fixed fee of €25 (excl. VAT) applies to orders under €500.

International & Offshore: For deliveries to Corsica and French Overseas Territories (DOM-TOM), a customized shipping quote will be provided.

For any inquiries, please contact us at info@multiroir.com or by phone at +33 (0)1 45 10 15 20.

Simplified order tracking

Stay informed at every stage. From cart validation to final delivery, you can track the progress of your order in real-time through our automated email updates.

EURO CONTAINERS - PERFORATED WALLS - BASICLINE

The perforated Euro-standard container is compatible with all European standard containers, specifically Euro pallets.

Manufactured from polypropylene copolymer, it is both lightweight and robust thanks to its reinforced frame design. It is perfectly suited for the transport and storage of general goods as well as food products.

The perforated walls facilitate air circulation and prevent any moisture accumulation.

- Manufactured from heavy-duty polypropylene.
 - High stability thanks to the reinforced frame.
 - Temperature range: -20°C to +60°C.
 - Resistant to acids, bases, cold, and heat.
 - Available in standard sizes: 400x300 and 600x400 mm.
 - Food contact compliant.
 - Marking and branding available on request.
 - 100% recyclable.
- (See available accessories on pages 18–19.)

TRANSLUCENT EURO CONTAINERS - BASICLINE

The translucent EURO-LINE series is unique on the market! A range of 10 translucent Euro container references that allow for at-a-glance visibility of the contents.

This series maintains the same lightweight and robust characteristics as professional Euro containers. The series is fully compatible with all European standard containers, specifically Euro pallets.

- Manufactured from heavy-duty polypropylene.
 - High stability thanks to the reinforced frame.
 - Temperature range: -20°C to +60°C.
 - Resistant to acids, bases, cold, and heat.
 - Formats: Available in standard sizes: 200x150, 300x200, 400x300, and 600x400 mm.
 - Food contact compliant.
 - Marking and branding available on request.
 - 100% recyclable.
- (See available accessories on pages 18-19.)

EUROBOX CONTAINERS - COLOR SERIES

The colored EUROBOX range is available with perforated walls, ensuring a perfect match for your specific storage needs. Their compatibility with all European standard containers, including Euro pallets, simplifies integration into your existing logistics system. Our «colored» bins go beyond simple functionality by offering effective visual identification and clear product differentiation. Perfectly suited for various sectors, particularly food processing, these bins facilitate traceability and inventory management.

To ensure maximum efficiency, they can be paired with accessories to enhance the storage experience and meet your specific requirements.

- Manufactured from heavy-duty polypropylene.
- High stacking stability.
- Resistant to acids, bases, cold, and heat.
- Available in standard 400x300 and 600x400 mm sizes.
- Food contact compliant.
- Ergonomic handles for optimal handling.
- 100% recyclable.

COLORED EUROBOX SOLID WALLS

Designed to meet the most demanding professional requirements, this colored Eurobox stackable container with solid walls provides a reliable and durable solution for the transport and storage of industrial, food, and agri-food products.

Fully compatible with Euro standards, it is stackable to ensure optimized and secure organization.

For more information regarding color variations and options, please contact us.

Reinforced open or closed handles

Reinforced honeycomb base for superior strength

Heavy-duty reinforced structure

COLLAPSIBLE CONTAINERS WITH SECURE LOCK

Designed to offer exceptional manufacturing quality, these containers are praised for their ease of use, making them a preferred solution across various professional sectors.

Combining ecology and economy, these reusable containers are made from virtually unbreakable polypropylene and comply with European standards. Their quiet, effortless folding mechanism, combined with

an active locking system upon deployment, ensures easy and secure handling.

- Virtually unbreakable polypropylene.
- Euro Standard compatible.
- Panels fold and unfold very easily, silently, and effortlessly.
- Active locking secures the container once it is deployed.
- Robust manufacturing guarantees perfect product protection.

STACK & NEST CONTAINERS - ECO RANGE

The Eco series of Stack & Nest containers is manufactured from recycled polypropylene. Just like the classic blue and brick-colored series, this range effectively resists chemical agents, temperature variations, and impacts.

These containers can be stacked (when full) and nested (when empty) by simple 180° rotation. This facilitates transport when full and storage when empty. Once nested, you can achieve 50% to 80% volume savings.

- Material: Heavy-duty recycled polypropylene.
- Standard: 600x400 mm (Euro Standard).
- Rigidity: Stacking load capacity up to 150 kg.
- Durability: Resistant to chemicals, temperature changes, and shocks.
- Robustness: Reinforced honeycomb base.
- Ergonomics: Open handles for easy handling.
- Nesting: Up to 78% space saving when empty.
- Emboîtable jusqu'à 78% pour un gagner un maximum de volume à vide.

MEDIUM-DUTY PALLETS - RECYCLED POLYPROPYLENE

The Medium pallet is a universal pallet suitable for all industry sectors. It is available with perforated decks (in stock) or solid decks (on request).

Available with 3 runners and safety rims, the medium pallet is equipped with retaining edges that prevent products (cartons, crates, etc.) placed on top from sliding and falling during transport. Thanks to these rims, it is entirely possible to move stacks of products without the risk of them sliding off due to an unstable base.

- Deck: Available with solid deck.
- Material: 100% recycled polypropylene.
- Base: Base with 2 or 3 runners.
- Available Color: Black.

MEDIUM-DUTY OPEN DECK PALLETS - RECYCLED POLYPROPYLENE

The RMP universal plastic pallet is suitable for all industry sectors, for storage, logistics, and automated warehouses.

Two sizes available: 1200x1000 mm and 1200x800 mm.

- Deck: Available with a perforated deck.
- Material: 100% recycled polypropylene.
- Base: Base with 2 or 3 runners.
- Available Color: Black.

HEAVY-DUTY SOLID DECK PALLETS - RECYCLED POLYPROPYLENE

Discover our plastic logistic pallets, robust allies for all your heavy load handling needs.

Carefully designed to offer exceptional resistance and maximum durability, these pallets are the ideal partners to optimize your supply chain.

Manufactured from high-quality plastic, our logistic pallets are designed to withstand the rigors of demanding industrial environments. Their solid construction allows them to support heavy loads without deformation, ensuring reliable protection of your goods during transport and storage.

- Deck: Available with a solid deck.
- Material: 100% recycled polypropylene.
- Base: Available with 3 or 6 runners.
- Available color: Black.

PICKING BINS

MLT OPEN-FRONTED BINS

The MLT series plastic open-front bins are designed to optimize storage, organization, and picking across all industry sectors.

They can be stacked on a workbench or placed on shelves. The front opening allows for quick content visibility and easy product access.

- Material: Polypropylene.
- Temperature Range: -30°C to +60°C.
- Food contact compliant (Red model only).
- Robust construction with reinforcements on the bottom and sides.
- Excellent stacking stability.
- Integrated label holder for product identification.
- Ribbed base to facilitate the picking of very small parts.
- Front grip handle for easy handling.

T. MLT OPEN-FRONTED BINS

Thanks to its translucent polypropylene construction, contents can be easily identified. Furthermore, this translucent picking bin is perfectly suitable for food storage.

- Material: Polypropylene (Translucent).
- Hygiene: Food contact compliant.
- Temperature Range: -30°C to +60°C.
- Stability: Excellent stacking stability.
- Integrated label holder.
- Ribbed base (for added strength and ease of picking).
- Ergonomic grip handle.
- Sustainability: Recyclable material.

ECOBIX PICKING BINS - RECYCLED PP

Multiroir's ECO series of open-front bins is designed for the organization and storage of all types of products.

Economical with unbeatable market prices, this range is also eco-friendly as it is manufactured from recycled plastic. The Polypropylene (PP) material provides high rigidity and impact resistance.

Space Saving: All bins are stackable for storage, but also nestable (they stack inside one another) to save on storage costs and space during transport.

- Material: Recycled PP.
- Mounting: Rear hanging lip for use on rails/louvre panels.
- Temperature Range: -30°C to +70°C.
- Identification: Integrated label holder (labels not included).
- Sustainability: Eco-friendly product made from recycled materials.

STACKABLE FOLDING PICKING BINS

This bin offers unmatched versatility thanks to its stackability, facilitating efficient product storage.

Its foldable design allows for compact storage when not in use, thereby optimizing space in your work environment.

- Material: Polypropylene.
- Durability: Excellent resistance to chemical agents and temperature variations.
- Range: 4 models available.
- Color: Blue.
- Key Features: Foldable and stackable.

STORAGE BINS

SMARTSTORE™ DRY AIRTIGHT STORAGE BOXES

The boxes in the SMARTSTORE™ DRY range are designed to withstand the toughest conditions, both indoors and outdoors.

Once locked, they become completely sealed, preventing humidity, dust, and insects from reaching the contents.

- Excellent sealing properties (IP64 / IP44 Standards).
- Nestable and stackable.
- Resistant to temperature variations (-40°C to +70°C).
- Chemical resistant.
- Manufactured from polypropylene.
- Food contact compliant.

MULTIBOX PLASTIC CONTAINERS

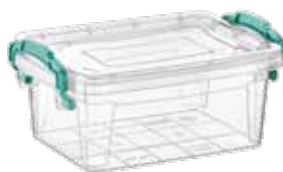

MULTIBOX offers security and ergonomics for storage and transport.

The lids are securely held in place by the clip-lock side handles. The flat bottoms of the boxes and lids ensure perfect stacking stability. The transparent material allows for easy content identification.

- Design: Smooth walls with a smooth, honeycomb-reinforced base.
- Hygiene: Food contact compliant and dishwasher safe.
- Efficiency: Stackable (with lid) and Nestable (without lid) for a 90% space saving when empty.
- Security: Fitted overfitting lid with secure closure via clip-on side handles.
- Temperature Range: -25°C to +95°C.

STORAGE BINS

PROBOX STORAGE CONTAINERS

The new generation of PROBOX bins has been developed to offer maximum quality, design, and functionality.

Economical yet robust, these bins are the ideal solution for all applications where content visibility is important. The PROBOX range is suitable for professional use across all sectors, particularly in the Food Service and HoReCa industries.

The bins are nestable without the lid for maximum space saving when empty.

The lid design ensures perfect stability when bins are stacked on top of each other.

Security: Locking clips ensure the lid stays firmly in place, providing total security during transport.

The reinforced base and corners ensure long-lasting durability.

- Manufactured from recyclable polypropylene.
- Food grade compliant.
- Easy grip thanks to two ergonomic handles.
- Secure lid retention with clip closure.
- Excellent stacking stability.
- Nestable when empty.
- Operating temperatures: -40°C to +120°C.

STORAGE BINS

MULTI-RACK DISHWASHER RACKS

Multiroir's MULTI-RACK range is a complete solution for washing, transporting, and storing tableware.

This latest-generation range combines exceptional durability with long-lasting performance.

Versatility: Designed to accommodate all types of glasses, plates, cups, trays, cutlery, and accessories.

Ergonomics: Carefully optimized design featuring rounded contours and easy-grip handles designed for user comfort (preventing finger strain).

Efficiency: The open-profile design has been specifically engineered to ensure thorough washing and optimal drying.

Construction & Materials Multi-rack glass racks are manufactured from recyclable polypropylene and are resistant to both heat and cold. The grey base racks feature double-walled construction, providing excellent stability and robustness. Your glassware is washed, transported, and stored in total security. The blue extenders clip easily and permanently onto the bases, allowing the rack to be adapted to the specific height of your glasses.

- Material: Recyclable PP.
- Resistance: Resistant to chemicals and impacts.
- Safety: Food-grade standard.
- Temperature range: -40°C to +70°C.
- Performance: Optimal drying with little to no wiping required.

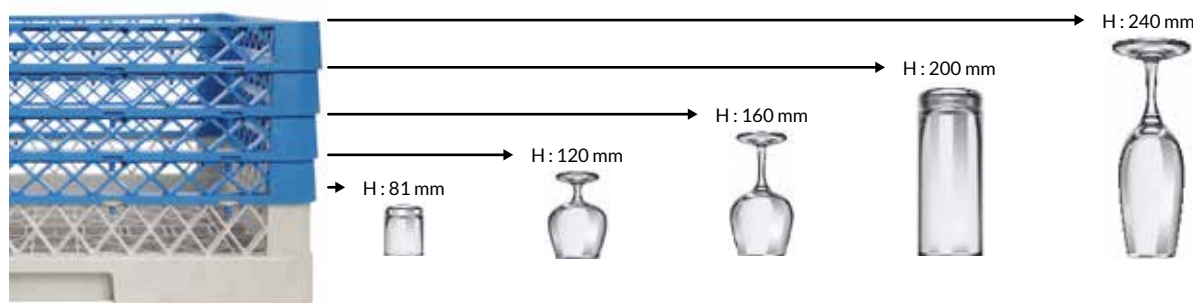

Modular system. Bases and extenders are supplied separately and assemble easily without tools.

Scan & discover!

HOW TO CHOOSE THE NUMBER OF EXTENDERS?

To determine the number of extenders required for transporting and storing your glassware, you must know the height of the glass. Once you have this information, please refer to the chart below.

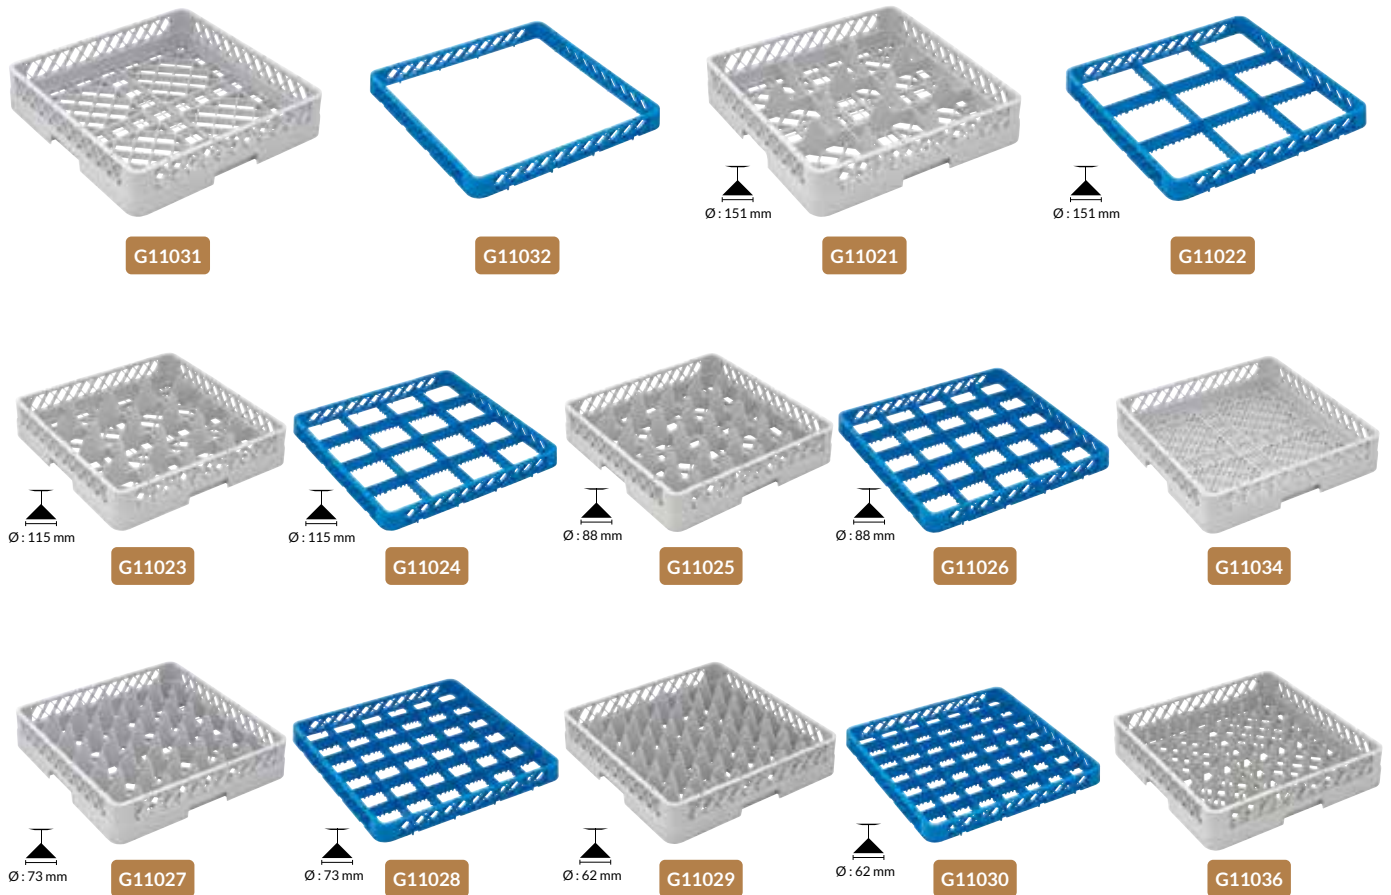

HOW TO CHOOSE THE BASE ACCORDING TO GLASS DIAMETER?

To determine the correct rack model, measure your glass at its widest point. This could be the base, the body, or the rim of the glass.

Note: Next to each photo, you will find an icon () followed by the maximum diameter accepted by that model.

DRAWER UNITS

MULTIROIR CRISTAL RANGE

5 standard models, ranging from 1,900 cm³ to 30,000 cm³.

Modularity: Perfectly modular by model, combinable at will, and interlocking on all sides to form high-quality storage assemblies.

Visibility: Made from high-transparency material that is both shock-resistant and UV-resistant, ensuring your products are showcased effectively.

Features: Each model includes a drawer stop, a handle with a label holder, and can be equipped with removable dividers.

- Material: Crystal Polystyrene.

DRAWER UNITS

MULTIROIR TBS

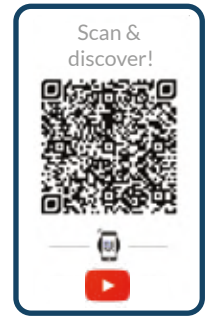

The TBS Multiroir series includes 5 models.

Like all Multiroir units, the TBS series features dovetail interlocking on all sides. All TBS models feature the same slide size, making them perfectly combinable with one another.

Each model is equipped with a drawer stop (to prevent accidental removal), a handle with a label holder, and can be fitted with removable dividers.

Note: Models A, B, C, and D are automatically supplied with removable dividers.

PM SERIES UNITS

This unit consists of 6 drawers made from High Impact Polystyrene (HIPS).

The drawers are stackable and can be equipped with thermoformed compartment trays and/or small round storage boxes.

Colors: Drawers are available in a single color or in 6 assorted colors for easy part identification.

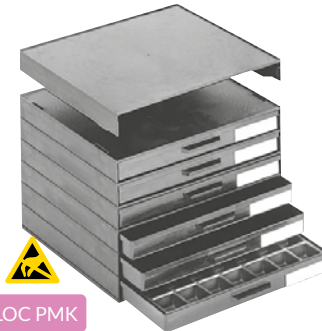

Usage: PM drawer trays are highly practical for storing small parts, particularly in electronics, jewelry, precision mechanics, optics, etc.

Conductive Option: All references are available in a conductive version (Black) for ESD protection. ⚠️

- External Unit Dim (L x D x H): 273 x 265 x 189 mm.
- Internal Drawer Dim (L x D x H): 260 x 237 x 22 mm.

PLASTIC CASES

MAX SERIES WATERTIGHT CASES

The Max Series consists of watertight and airtight models certified to IP67 standards.

Compliance with this standard guarantees a case that is perfectly impervious to dust and water.

These cases are used in a wide range of sectors, such as electronics manufacturing, navigation,

marine applications, and photography. Thanks to their reinforced structure and internal retention foam, MAX cases ensure optimal protection for your products.

- IP67 Certified.
- Dustproof.
- Shock resistant.

- Waterproof.
- Vibration resistant.
- Temperature resistant: From -30°C to +90°C.
- Suitable for air transport.
- Customization on request.

1 Lid fitted with an O-ring seal.

2 Automatic pressure release valve.

3 Easy-opening double throw latches.

4 Heavy-duty handle designed for a comfortable grip.

5 Double padlock holes.

6 Shoulder strap attachment points (depending on model).

7 Interlocking stacking system.

8 Thick walls for extra durability.

9 Extra fixing points for various applications.

10 Full-length hinge.

11 Corrosion-free nylon pins.

12 Standard version includes cubed foam in the bottom and convoluted foam in the lid.

13 Screen printing space on the lid.

14 Rectangular slot for ID label.

PTX COMPARTMENT TRAYS

- 1 tray required for model LAB 5.
- 2 trays required for model LAB 6
- Units per pack : 1

CUSTOMIZATION SERVICES

To convey your brand image, protect, or showcase your products, coloring, printing, and custom inserts can be produced according to your needs on these LAB boxes.

CRYSTAL CASES

The Crystal Case range consists of 5 high-quality models offering perfect transparency.

Each model features a wall thickness of 3 to 4 mm. Manufactured via PMMA plastic injection molding, these crystal cases feature a seamless finish (no folding marks or glue lines).

These acrylic boxes are high-end products, boasting a refined design and clean lines that will perfectly showcase your products. Each model is packaged in an individual PE bag.

- 5 different standard models.
- Attached hinged lids.
- Customization: Available on request (subject to minimum quantities).
- Food Safety: Food contact approved quality.
- Clarity: Perfect transparency.

Customization of these luxury cases is available through external branding/marketing and interior inserts. Multiple options are available, allowing you to acquire a unique model that perfectly represents the image you wish to convey.

PLASTIC BOXES

V9 COMPARTMENT BOXES

V9 compartment boxes are suitable for the storage, transport, and presentation of small parts.

This latest-generation range of storage boxes consists of 10 models in various dimensions. All models feature a perfectly transparent lid to showcase the products inside. The boxes are equipped with white removable compartment trays.

Made in France from high-quality materials, V9 compartment boxes are

resistant and durable. The material thickness, sleek design, and build quality make them excellent presentation boxes for professionals.

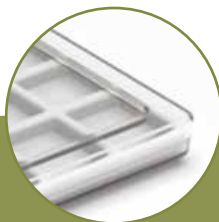

- Made in France.
- Material: 100% recyclable virgin material.
- Box Material: Styrene-butadiene copolymer.
- Tray Material: Polystyrene.
- Lid: Transparent with secure snap closure.
- Stacking: Perfect stacking stability.

SNAP CLOSURE SYSTEM

Heavy-duty hinged lid with snap-shut mechanism.

This system prevents accidental opening in the event of drops or impact.

TRANSPARENT HINGED LID WITH RIM

The high clarity of the lid offers the advantage of displaying your products while protecting them.

The shape of the lid allows for highly stable stacking.

ROUND / ARROW-SHAPED FEET

Stability when boxes are placed on surfaces or stacked is ensured by the presence of integrated feet.

MULTICASE - FIXED & REMOVABLE COMPARTMENT BOXES

Multiroir innovates with MULTICASE, its new range of compartment boxes. These boxes offer a modern and practical solution for the storage, organization, transport, and presentation of small parts.

Their versatility makes them ideal for numerous applications in various sectors such as optics, electronics, laboratories, industry, museums, and the medical field.

Innovative Design & French Quality MULTICASE boxes stand out due to their innovative design, offering a choice of 12 models with fixed or removable compartments. Available in 5 sizes (A4, A5, A6, A7, and A8), they are manufactured in France using high-quality materials. The sleek design, material thickness, and lid transparency perfectly showcase the products contained within.

Efficiency & Organization This range offers numerous advantages. Thanks to the wide selection of models and the ability to modulate the compartments, professionals can organize the interior of the boxes to suit their exact needs and access contents quickly.

An Eco-Responsible Approach MULTICASE boxes are eco-friendly, made from 100% recyclable virgin material. Multiroir designed this range with sustainability in mind:

Short supply chains reduce transport-related carbon emissions.

Designed to be robust and long-lasting, preventing unnecessary waste.

Energy Efficiency: The use of electric injection molding machines at our Seine-et-Marne factory contributes to a more energy-efficient manufacturing process.

- 12 models available with fixed or removable compartments.
- 5 sizes: A4, A5, A6, A7, and A8.
- Material: 100% recyclable virgin Polypropylene.
- Closure: Hinged lid with secure snap closure.
- Stacking: Perfect stability thanks to integrated stacking feet.
- Temperature Resistance: -20°C to +80°C.
- Visibility: Excellent content visibility thanks to the transparent lid.
- Security: Dividers extend to the very top of the box to prevent small parts from migrating between compartments.
- Fixed and removable compartments for A4, A5, and A6 sizes.
- Fixed compartments for A7 and A8 sizes.

CONTACT US

Customization is available subject to minimum order quantities. Please contact us directly for any requests.

Customizable fixed compartments for A7 and A8 sizes upon request. This offers professionals a solution perfectly adapted to their specific needs.

Box or compartment colors available upon request.

Box marking/printing available upon request.

SNAP CLOSURE SYSTEM

This system secures the box, preventing accidental opening in case of drops or impact.

FIXED / REMOVABLE DIVIDERS

Our boxes offer optimal stability and efficiency for storing small parts and accessories.

ROUND STACKING FEET

Thanks to the stacking feet, box stacking becomes extremely stable, allowing for ideal storage space optimization.

BASICBOX STORAGE BOXES

BASICBOX storage boxes are suitable for the storage and organization of all types of products.

Manufactured from high-impact material, they combine lightweight design, transparency, and ergonomics. The transparency allows for easy identification of contents.

The lid is secured by 2 clips located on either side of the box. Boxes stack securely and stably on top of each other. Reinforced rounded corners ensure safety and user comfort.

- Easy handling thanks to two ergonomic handles.
- Temperature Range: -40°C to +120°C.
- Material: Recyclable Polypropylene.
- Color: Transparent / Translucent.
- Stability: Excellent stacking stability.

ELASTIC MEMBRANE BOXES

Optimal protection!

Membrane boxes are based on a patented design.

Each box features an ultra-thin polyurethane membrane.

Objects are held securely suspended inside the box, effectively protecting them from shock and vibration.

This unique system is ideal for packaging and transporting delicate items of various shapes and sizes.

- Transparency: Allows for immediate visual inspection without opening the box.
- Reusable: Features a hinge and latch closure system.
- Yellow latch models: Delivered as separate halves (self-assembly required). Blue latch models: Delivered fully assembled.

HDPE 500 BOARDS

Multiroir's High-Density Polyethylene worktops are acclaimed by the most demanding professionals for their exceptional hardness and hygiene properties.

Manufactured from High-Density Polyethylene 500 (HDPE 500) via thermo-compression, this material offers an unrivaled lifespan, maximum abrasion resistance, and optimal rigidity.

Through our Lobrot division, we benefit from over 30 years of expertise in PE transformation, allowing us to provide a diverse range of worktops that meet the strictest standards. Designed to withstand cleavers, knives, and other sharp tools, our HDPE 500 worktops preserve the quality of your instruments while ensuring impeccable hygiene.

Our range includes standard sizes as well as custom-cut options, ensuring a perfect fit for every professional need. Additionally, various colors are available, offering both aesthetic customization and functional color-coding for users.

Custom Projects: Whether you are planning a worktop replacement, need a specific cutting board, or require a custom installation, do not hesitate to contact our team.

Email: info@multiroir.com
Phone: +33 (0)1 45 10 15 20

Note: Prices per m² apply to dimensions ranging from 400x300 mm to 2000x1220 mm. For any other dimensions, please request a personalized quote from our sales department.

- Material: HDPE 500 (High-Density Polyethylene).
- HACCP Compliant: Meets food safety guidelines.
- Temperature Resistance: Up to +80°C.
- Surface Properties: Excellent low-friction and non-stick characteristics.
- Durability: High resistance to abrasion, shock, and wear.
- Chemical Inertia: Resistant to chemical agents.
- Hygiene: No moisture absorption (rot-proof).

STANDARD SIZE BOARDS

All standard size boards are available in stock. These are simple boards, without feet, featuring chamfered edges. All items are delivered shrink-wrapped, with a differentiation label and barcode. 6 colors available (ideal for color-coding to prevent cross-contamination).

LIGHT GREY MULTI-PURPOSE TROLLEYS - ABS CASTORS

These multi-purpose plastic trolleys combine lightweight design with exceptional strength.

- Structure: Aluminum frame.
- Shelves: Heavy-duty polypropylene (15 mm) reinforced with fiberglass.
- Castors: 4 swivel castors, 2 with brakes (except models 65016 & 65017).
- Bearings: Ø 100 mm castors mounted on ball bearings.
- Performance: Silent movement and low starting resistance.
- Safety: Phthalate-free, 100% non-toxic.
- Color: Light Grey.

LIGHTWEIGHT STAINLESS STEEL TROLLEYS

The 201 Series stainless steel trolleys are specifically designed for demanding environments such as retail stores, laboratories, professional kitchens, medical facilities, or industrial sites.

Constructed from AISI 201 stainless steel, they guarantee strength, ease of maintenance, and excellent durability.

- Material: AISI 201 Stainless Steel.
- Lightweight and excellent maneuverability.
- Tube thickness: 0.7 mm.
- Handles: 2 push handles.
- Wheels: 4 swivel castors Ø 100 mm (2 with brakes).
- Wheel type: TPR (Thermoplastic Rubber) noiseless castors.
- Protection: 4 corner bumpers.
- Assembly: Supplied flat-packed - easy to assemble.

	SKU	Number of shelves	Dim. (mm) A x B x C - D	Load Capacity (kg) total / per shelf	Units per pack
1	RST2A	2	850 x 540 x 940 - 560	60 / 30	1
	RST3A	3	850 x 540 x 940 - 270	90 / 30	1
2	RST2C	2	710 x 410 x 810 - 470	50 / 25	1
	RST3C	3	710 x 410 x 810 - 220	75 / 25	1

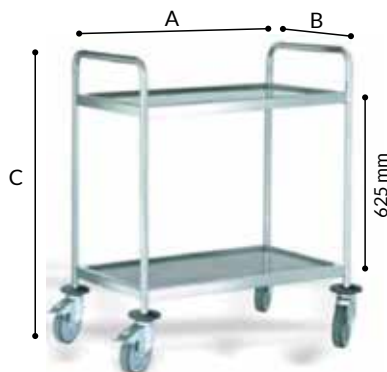

FULLY WELDED STAINLESS STEEL TROLLEYS

All stainless steel trolleys in this range are manufactured with the utmost care, ensuring impeccable quality throughout the series.

The material selection meets the highest standards. Argon arc welding is used to ensure maximum robustness and durability.

- Delivered fully assembled.
- Frame: 1.5 mm thick stainless steel tubular structure.
- Shelves: Sound-deadened shelves, fully welded to the tubular frame.
- Castors: Ø 125 mm swivel castors, 2 with brakes.
- Max load capacity: 250 kg per trolley and 80 kg per level.
- Protection: Equipped with 4 corner bumpers.

CABINETS & SHELVING

Professional cabinets and shelving systems are designed for the efficient storage and organization of a wide range of goods.

Available in polypropylene, galvanized steel, or chrome-plated steel, our diverse ranges adapt to any storage environment, including offices, workshops, retail spaces, or laboratories.

Regardless of the size, weight, or volume of the items to be stored, you will find a solution that meets the specific needs of your department or team.

104 Plastic storage cabinets

105 Steel shelving for Euro containers

106 Modular metal shelving

107 Grey Epoxy coated shelving

107 Plastic shelving units

108 Security roll containers

108 Roll containers

109 ECO galvanized shelving

PRODUCT RANGE ON OUR
WEBSITE.

PLASTIC STORAGE CABINETS

Multiroir offers a complete range of robust plastic cabinets made from heavy-duty polypropylene.

Ideal for indoor storage, these cabinets are rot-proof, rust-proof, and maintenance-free.

All modules can be linked together using connectors to create a stable and solid storage system.

- Color: Grey.
- Material: Polypropylene (80% recycled material).
- Load Capacity: 30 kg per shelf.
- Assembly: Delivered flat-packed, assembly time between 10 and 15 min.
- Option: Key lock available on request.

AR 700

Base 2-Door Cabinet includes:

- 2 storage bins.
- 2 shelves.

AR 2700

Tall 2-Door Cabinet includes:

- 2 storage bins.
- 4 shelves.

Central support foot for superior stability.

Stylish design.

180° door opening.

Heavy-duty panels.

Height-adjustable shelves.

Modèle	SKU	Ext. dim. (mm) L x W x H	Max load (Kg)	Max load per shelf (Kg)	Included components	Units per pack

STEEL SHELVING FOR EURO CONTAINERS

This modular shelving system is designed to accommodate 600x400 Euro-standard containers.

Featuring an open steel structure without cross-bracing, this shelving unit allows for loading from both the front and rear. This design is ideal for FIFO (First In, First Out) inventory management.

- Compatible with 600x400 Euro-standard containers.
- Rail system adjustable in 25 mm increments.
- Easy assembly and simple expansion using add-on units.
- Open structure (no cross-brace): enables rear loading and front picking (FIFO method).
- Made in France.

Shelf fixing brackets

Uprights:

- Profiled uprights: 43 x 39 mm.
- Side perforations in 25 mm increments (for rail attachment).

Top shelves (High shelves)

- Welded sheet metal shelves, painted RAL 7035 (Light Grey).
- Attached to the upright's side perforations, then secured using fixing brackets (A).
- They ensure structural rigidity and act as a dust cover for the contents below.

Rails:

- Galvanized steel.
- Designed to securely support the containers.
- Optional: Rear stop to prevent containers from falling through.

Base shelves (Low shelves):

- Shelves featuring welded tubular frames, painted RAL 7035 (Light Grey).
- Attached to the upright's side perforations, then secured using fixing brackets (A).
- They ensure the unit's structural rigidity and allow for the lowest possible storage level.

SKU	Designation	Ext. dim. (mm) L x W x H	Int. dim. (mm) L x W x H	Included components	Units per pack
ATZD2000	Starter unit H2000 for 600x400 containers	495 x 600 x 2000	410 x 600 x 1900	5 pairs of rails / 1 top shelf / 1 base shelf	1

ATL6040	Pair of rails for 600x400 containers	590 x 45	-	1 pair	1

MODULAR METAL SHELVING

This modular metal shelving system adapts perfectly to various storage environments and applications (offices, workshops, etc.). Designed to meet standard storage requirements, this system offers exceptional flexibility.

Load Capacity: For standard loads, the shelves are designed to support up to 150 kg per level. For heavier requirements, the shelving can be upgraded with reinforcements, increasing the load capacity to 330 kg per shelf.

Customization: Total customization is at your fingertips thanks to our extensive range of accessories. You can configure your modular metal shelving to suit your specific needs, whether for storing, sorting, or organizing small loose items such as fasteners, fittings, or plumbing components.

Scalability: This simple and quick-to-assemble solution allows you to safely modify and expand your existing installation as your needs evolve.

Applications: With its specific design and configuration, this shelving is primarily intended for the industrial sector, workshops, and retail stockrooms.

Structure: Manufactured from galvanized steel, our metal shelving is synonymous with exceptional durability. It is designed to optimize space utilization by maximizing vertical storage, thus facilitating the creation of multi-level installations.

STARTER UNIT

- 5 sheet steel shelves: 32 mm height, 0.6 mm thickness.
- 4 galvanized steel uprights.
- Finish: Galvanized steel grey.

ADD-ON UNIT

- 5 sheet steel shelves: 32 mm height, 0.6 mm thickness.
- 2 galvanized steel uprights.
- 1 rear stabilizer cross-brace.

PLASTIC SHELVING UNITS

This plastic shelving system is a modular, lightweight, and durable storage solution, perfectly suited for storing equipment in any environment: warehouses, workshops, laboratories, cleanrooms, public facilities, or areas prone to humidity.

- High-resistance Polypropylene.
- All components are delivered flat-packed.
- Fast assembly: 10 minutes max.

SECURITY ROLL CONTAINERS

Available in two sizes, these mesh security roll containers are robustly constructed for durable, intensive professional use.

Designed to absorb shocks and impacts, they ensure the protection of the goods inside. The load capacity ranges from 600 kg to 720 kg (depending on the model).

- High-resistance base: 50 x 50 mm mesh with steel reinforcements.
- Structure: Mechanically welded steel with an electrolytic zinc finish, 50 x 50 mm mesh.
- Wheels: Ø 100 mm black polypropylene wheels (2 fixed and 2 swivel castors).
- Max Load: 400 kg.
- Delivery: Unit supplied.
- Optional accessories: Shelf.

ECO GALVANIZED SHELVING

The GALVA ECO galvanized shelving system is engineered to meet the professional storage requirements of any industry. This system combines ease of assembly, functionality, and practicality to ensure exceptional durability.

System Components:

- **Uprights:** Precision-engineered, these uprights feature a sleek «T»-shaped profile measuring 40x37 mm. The absence of front-facing perforations reinforces structural integrity, while strategically placed side perforations offer a versatile adjustment pitch of 40 mm. This allows for effortless customization to accommodate items of various sizes.
- **Tubular Shelves:** Fully demountable, the tubular shelves interlock perfectly into the uprights' side perforations. They consist of two front tubes, two side supports, and central tubes (quantity varies according to depth). This smart design ensures stability while providing the flexibility needed to store items of different dimensions.

UNDERSTANDING THE SYMBOLS

HACCP

HACCP is a management system in which food safety is addressed through the analysis and control of biological, chemical, and physical hazards.

Based on 7 core principles, the implementation follows a 12-step logical sequence, including hazard analysis and the determination of critical control points. HACCP focuses on three classes of food safety hazards:

- Biological hazards (viruses, bacteria, etc.)
- Chemical hazards (pesticides, additives, etc.)
- Physical hazards (wood, glass, etc.)

PEFC (Programme for the Endorsement of Forest Certification) attests to the sustainable management of forests and the respect of their environmental, social, and economic functions. It guarantees the application of strict rules by all forest stakeholders (owners, operators, and contractors).

FSC (Forest Stewardship Council) is a market-based tool aimed at promoting responsible forest management worldwide. Products from FSC-certified forests are tracked from their origin, throughout the manufacturing process, and up to distribution. The FSC label guarantees that the materials used come from controlled and responsibly harvested resources.

The Möbius loop (also known as the Möbius strip or ring) has been the universal symbol for recyclable materials since 1970. It identifies a product as being recoverable.

If the loop includes a percentage in the center, the meaning changes: the percentage indicates that the item or packaging contains a specific amount of recycled materials.

This symbol is mandatory on all recyclable packaging and products (except glass containers). It signifies that the product must be sorted for recovery.

Symbolically, the silhouette represents citizen action, the three arrows represent sorting, and the circular arrow embodies recycling.
